The Safe Patient Handling Program

The Safe Patient Handling Program will demonstrate the commitment to a culture of safety. The program involves state of the art equipment, a commitment to the education and training of caregivers, and participation of clinicians throughout the facilities. The Safe Patient Handling Program benefits patients and staff through injury prevention, early ambulation, avoidance of falls, and improved clinical outcomes. Stay tuned for more exciting safety news as we approach the September launch dates. Be sure to look for us as we set-up demonstration booths and learning activities at Hillcrest and Thornton in the near future.

Safety Starts with Me!
